

一、首页静态数据整合

1、添加静态资源

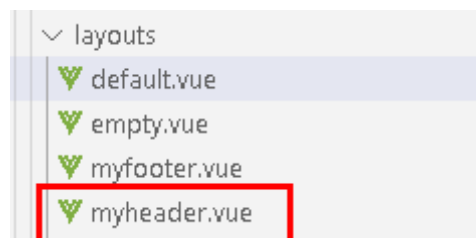

将静态资源下面的css、images文件夹添加到assets目录

2、修改页面布局

2.1 提取头文件

创建layouts/myheader.vue文件

```
1 <template>
2   <div class="header-container">
3     <div class="wrapper">
4       <!-- logo -->
5       <div class="left-wrapper v-link selected">
6         尚医通 预约挂号统一平台</span>
8       </div>
9       <!-- 右侧 -->
10      <div class="right-wrapper">
11        <span class="v-link clickable">帮助中心</span>
12        <span class="v-link clickable" @click="dialogUserFormVisible = true">
```

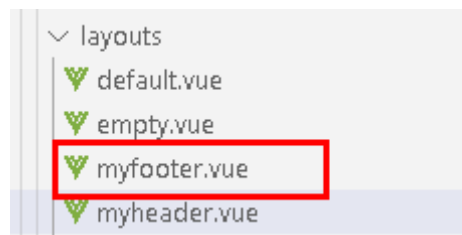

```

13         </div>
14     </div>
15 </div>
16 </template>
17 <script>
18 export default {
19 }
20 </script>

```

2.2 提取尾文件

创建layouts/myfooter.vue文件

```

1 <template>
2   <div class="footer-container">
3     <div class="wrapper">
4       <div><span class="record">京ICP备atguigu号</span><span
5         class="phone">www.atguigu.com</span></div>
6       <div class="right"><span
7         class="v-link clickable"> 联系我们 </span><span
8         class="v-link clickable"> 合作伙伴 </span><span
9         class="v-link clickable"> 用户协议 </span><span
10        class="v-link clickable"> 隐私协议 </span></div>
11     </div>
12   </div>
13 </template>
14
15 <script>
16 export default {
17
18 }
19 </script>

```

2.3 修改默认布局页面

修改layouts/default.vue文件

```
1 <template>
2   <div class="app-container">
3     <div id="main">
4       <!-- 公共头 -->
5       <myheader/>
6       <div class="main-container">
7         <el-scrollbar class='page-component__scroll'>
8           <!-- 内容区域 -->
9           <nuxt/>
10        </el-scrollbar>
11      </div>
12      <!-- 公共底 -->
13      <myfooter/>
14    </div>
15  </div>
16 </template>
17 <script>
18 import '~/assets/css/app.css'
19 import '~/assets/css/chunk.css'
20 import '~/assets/css/iconfont.css'
21 import '~/assets/css/main.css'
22
23 import myheader from './myheader'
24 import myfooter from './myfooter'
25
26 export default {
27
28   components: {
29     myheader, myfooter
30   },
31
32   mounted() {
33     window.document.getElementById("__nuxt").classList.add("app-container")
34     window.document.getElementById("__layout").classList.add("app-container")
35   }
36 }
37 </script>
```

2.4 修改pages/index.vue页面

```
1 <template>
2   <div class="home page-component">
3     <el-carousel indicator-position="outside">
4       <el-carousel-item v-for="item in 2" :key="item">
5         
6       </el-carousel-item>
7     </el-carousel>
8     <!-- 搜索 -->
9     <div class="search-container">
10      <div class="search-wrapper">
11        <div class="hospital-search">
12          <el-autocomplete
13            class="search-input"
14            prefix-icon="el-icon-search"
15            v-model="state"
16            :fetch-suggestions="querySearchAsync"
17            placeholder="点击输入医院名称"
18            @select="handleSelect"
19          >
20            <span slot="suffix" class="search-btn v-link highlight clickable selected">搜
21          </el-autocomplete>
22        </div>
23      </div>
24    </div>
25    <!-- bottom -->
26    <div class="bottom">
27      <div class="left">
28        <div class="home-filter-wrapper">
29          <div class="title"> 医院</div>
30          <div>
31            <div class="filter-wrapper">
32              <span
33                class="label">等级: </span>
34              <div class="condition-wrapper"><span
35                class="item v-link highlight clickable selected">
36                全部 </span><span
37                class="item v-link clickable">
38                三级医院 </span><span
39                class="item v-link clickable">
40                二级医院 </span><span
```

```
41         class="item v-link clickable">
42             一级医院 </span></div>
43     </div>
44     <div class="filter-wrapper">
45         <span
46             class="label">地区: </span>
47         <div class="condition-wrapper"><span
48             class="item v-link highlight clickable selected">
49             全部 </span><span
50             class="item v-link clickable">
51             东城区 </span><span
52             class="item v-link clickable">
53             西城区 </span><span
54             class="item v-link clickable">
55             朝阳区 </span><span
56             class="item v-link clickable">
57             丰台区 </span><span
58             class="item v-link clickable">
59             石景山区 </span><span
60             class="item v-link clickable">
61             海淀区 </span><span
62             class="item v-link clickable">
63             门头沟区 </span><span
64             class="item v-link clickable">
65             房山区 </span><span
66             class="item v-link clickable">
67             通州区 </span><span
68             class="item v-link clickable">
69             顺义区 </span><span
70             class="item v-link clickable">
71             昌平区 </span><span
72             class="item v-link clickable">
